GAMBLING GAME WEB APPLICATION

ABSTRACT

Nowadys , Gambling has just become a General Game.
In Our Project, we have implemented a Betting or Gambling game Application called "Shark Dice". This game can collect data of Players and stores in DB. Further the Players can compete with oponents online(Not yet Implemented).

This is a Working application, but capable of Supporting only in one system at a time. But one drawback would be that, user has to refresh the pages to update the datas of the page.

Maybe in the Future, we would be clearing such a great BUG. Fine now the Abstract part of this project is gonna get over.

BACKGROUND WORKS BY APPLICATION :

In the Back-hand, the application fetches the data from the User and stores them in a DB Tables. And further, updates the datas whenever needed from the DB.

The Git Hub Link of the Leader Boy : https://github.com/thishariharan/Sem-4-HTML.git

MOTIVATIONAL THOUGHT :

After studying the data base connectivity in java, PHP Implementation, MySql Codes and even JS and HTML and GUI makes us to generate report automatically by using too many Buttons connected to the database and leave database. In this report we just want to give information of Project and it's Implementation and report will be generated in Hard and Soft Copy format.

MAIN GOAL TO BE ACHIVED :

Here, in our Betting Application, we are able to Create a new Account, and then fetch the data of User and the other people involved in the Game / Something. The Gathered information are further stored in the SQL table using certain commands. The User can even play with others.

This is a Short passage that says the operations done with our Application.

THE SHORT PROCEDURE FOR SHARK DICE :

In Short the Operations performed is typed below,

1 – In the Home Screen, User is able to Login / Register.
      1.1 – When Creation is done, User will be taken to the Home page   again.

2 – At first, the Applications gets the Details like number of Name, Password, and more of   User Details and on clicking the Button everything is Recorded.

3 – User can select a Mode to play.
      3.1 – They are directed to the Gameplay Page.

4 – Application fetches the Information's of the User and the Opponents.
      4.1 – Use the Dice in the Page to Play the Game.

5 – Rules of the Game is given in the Game Page.

6 – Once the Match is Over, the Winner gets reward.

7 – The Looser is eliminated.

8 - Again the User is directed to the Home Page.

THE MODULES THAT MADE THE APPLICATION A MASTER-PIECE ARE :

1] Home Page   -   Donation, Chat with us and Our Details.

2] Login Page   -   Gets User Data and checks if Exist.

3] Creation Page   -   Gets User data and a New Account is Created.

4] Game Home Page -   User Details and their Bank Balances are shown.

5] Bet Page   -   User is able to give a amount to bet.

6] Game Page   -   User can play the game with opponents.

7] Elimination Page   -   The User may get Eliminated on loosing.

8] Final Page   -   The Application shows Victory/Defeat Sign and directs to the Home Page again.

Let's Start with Application Shark Dice ...

The Database Name - Shark_Game :

Table are,

      I - Bank(User_Name varchar(50),Password varchar(50),Phone bigint, Account_Number bigint,Balance float)

      II - Player(User_Name VARchar(50),Passcode varchar(50),Phone bigint,email varchar(50),Age int,Account_Number bigint, match_no int,points int)

      III - wallets(User_Name varchar(50), Account_Number int,Balance Float)

      IV - current_match (User_Name varchar(50),match_no int,points int, Bet float,Gain float,Chaos int)

      V - Company (Amt float)

      VI - donar (Name varchar(50),Email varchar(50),Amt float)

      VII - chat (Name varchar(50),Email varchar(50),Message varchar(500))

      VIII - Choose (val int,nope int,play int)

      IX - win (amt int)

Bank Table - Stores Users Bank data, doesn't get affected during the play

CREATE TABLE Bank(User_Name varchar(50),Password varchar(50),Phone bigint, Account_Number bigint,Balance float);
INSERT INTO Bank VALUES('Kent Man','s00ran', 9124246521 , 645121111 ,6710), ('Clark','yo00kman', 9876546521 , 33982122324 ,2560), ('Kumaran','m0kuran', 6543246521,33219992324 ,7777), ('Muthu Pandi','pandurangan@man', 9876541231 , 3321231111 ,4567), ('Soorya Pandian','ragun@man', 6786541231 , 4121231111 ,1000), ('Harry Potter','manusan@man', 9876121231 , 6781231111 ,10000), ('Guru Moorthy','ukram666', 5623123521,8721231111,6710),
('Clark','yo00kman',7654246521,34565122324,4200),
('Look Deer','wetam11',9993246521,33219999876,3500), ('Forks Pant','ugadu@man',932113231, 4527839811,890);

User_Name	Password	Phone	Account_Number	Balance
Kent Man	s00ran	9124246521	645121111	1670
Clark	yo00kman	9876546521	33982122324	2560
Kumaran	m0kuran	6543246521	33219992324	7777
Muthu Pandi	pandurangan@man	9876541231	3321231111	4567
Soorya Pandian	ragun@man	6786541231	4121231111	1000
Harry Potter	manusan@man	9876121231	6781231111	10000
Guru Moorthy	ukram666	5623123521	8721231111	6710
Clark	yo00kman	7654246521	34565122324	4200
Look Deer	wetam11	9993246521	33219999876	3500
Forks Pant	ugadu@man	932113231	4527839811	890

Player Table - Stores Users Shark Dice Account data, may get affected during the play

CREATE TABLE Player(User_Name VARchar(50),Passcode varchar(50),Phone bigint,email varchar(50),Age int,Account_Number bigint, match_no int,points int);
INSERT INTO Player values
('Jithu','mines&booms',9124246521,'jist620@jml.com',23,645121111,26,65000), ('MIthune', 'gun&kimbos',9876546521,'guddu@real.com',41,33982122324,31,54000), ('Ashokkk', 'Aruns^Scams', 6543246521,'aksh@jml.com',20,33219992324,29,40000), ('Borne Man','amar&kamal',6786541231, 'guddu@real.com',40,4121231111,8,8900), ('Surraaaa','gun&kimbos',9876121231,'guddu@real.com',30, 6781231111 ,36,35000);
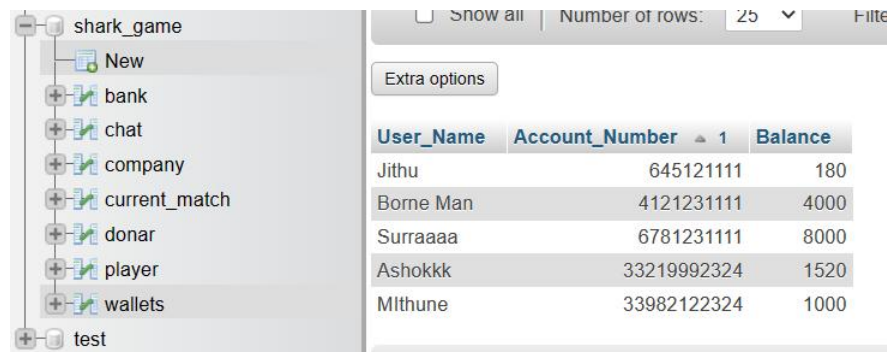

Wallets Table - Stores Users Temp Money data, get affected before and after the play

CREATE TABLE wallets(User_Name varchar(50), Account_Number int,Balance Float);
insert INTO wallets VALUES 'Jithu',645121111,400),('MIthune',33982122324,1000), ('Ashokkk', 33219992324,1520), ('Borne Man',4121231111,4000) ('Surraaaa',6781231111,8000);

Current_Match Table - Stores Users and Opponents data, get affected greatly during the play

CREATE TABLE current_match (User_Name varchar(50),match_no int,points int, Bet float,Gain float,Chaos int,play int);
INSERT INTO current_match VALUES ('MIthune',32,5000,400,0,0,1), ('Surraaaa',37,5000,2000,0,0,2), ('Ashokkk',30,5000,600,0,0,3);

Company Table - Stores Amount gained by the Company Shark Dice , get affected all the time

CREATE TABLE Company (Amt float);

Donar Table - Stores the Donation details

CREATE TABLE donar (Name varchar(50),Email varchar(50),Amt float);

Chat Table - Stores the Users chat details with the Company

CREATE TABLE chat (Name varchar(50),Email varchar(50),Message varchar(500));

Choose Table - Stores the Values for the Past Play indicates the Player of Pain and Gain

```
create table Choose (val int,nope int,play int);
insert into Choose (6,69,1);
```

Win Table - Stores the Bet amount of the Player Eliminated

```
CREATE TABLE win (amt int);
INSERT INTO win values (0);
```

PROGRAM THAT MADE THIS APPLICATION EXECUTABLE :

        <div class="cwu">
            <h2 id="ab">Talking about Sharks</h2>
              Helo, if you think we are gonna talk about the Sharks that lives Underlands, then
you're wrong you're totally Wrong!!<br>
            Here, we are just Gossiping about some Sharks you never Knew. Here there are 3 Sharks and 1
<span class="unq">King Shark</span>.
            <br><br><b>The First Shark</b> - Stab Shark<br>
              This Shark has a Too too much Violent history.Now, just take an Important note
that, here there is no Gender or Face Reveal is gonna happen.
            Now let's start a Gossip on this Shark. This Shark has a Sharp Nose with which it jumped upside
down into a Swimming Pool to destroy the Life of a Shark toy
            just without it's Consience. This made his Daughter cry so hard. This incedent had it get thrown
from it's den by the Dada of Mrs Stap. It Caught him dying
            with Wine. And that was the Day it met <span class="unq">King Shark</span>, it's life was totally
Changed.
```
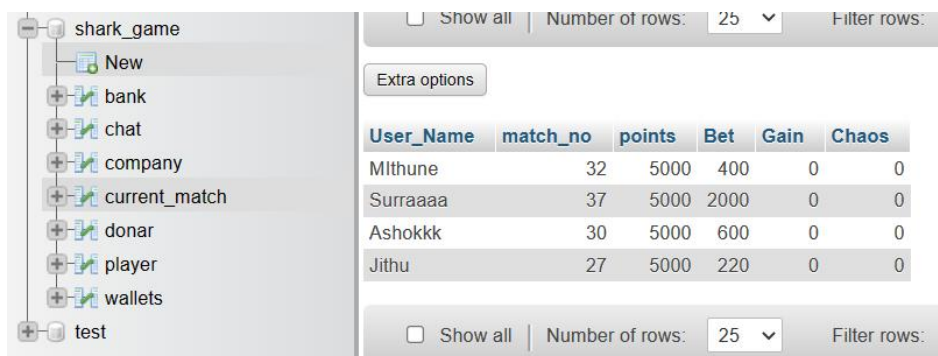

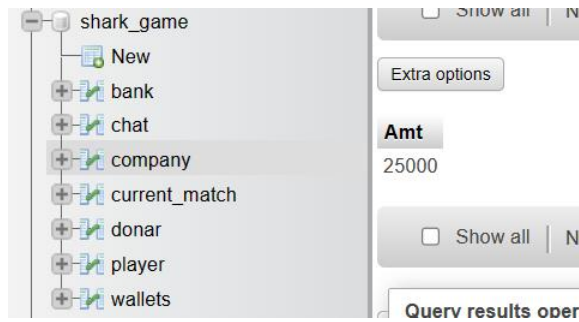

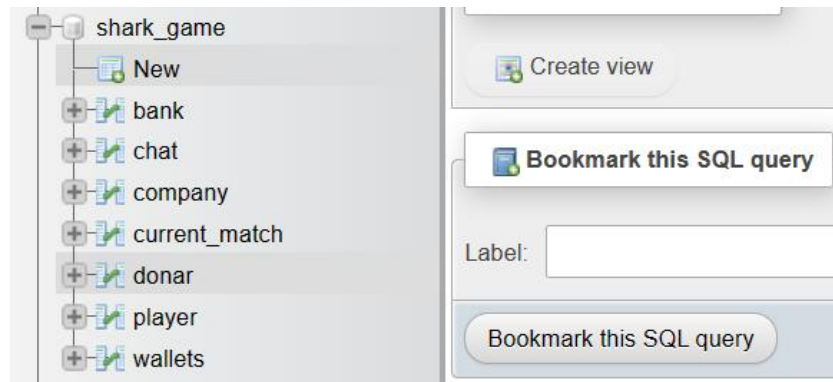

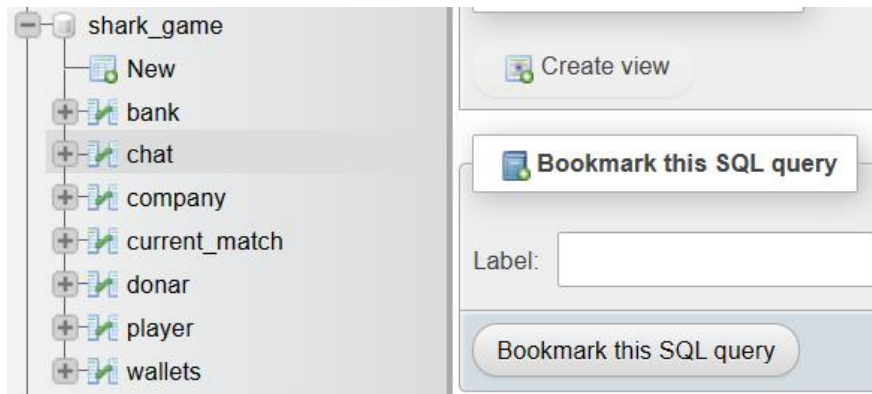

```html
<br><br><b>The Second Shark</b> - Duck Shark<br>
  Even this Shark has a Tragedic past, but the Story line is toooo weaker than Stap Shark. Let's Start from the Scratch, When it was kid it lost its
Parents in a Accidental dive into the Deep Ocean. The Emergency team just found it's Mother's Chain and Father's Kappu. By the end of the week of this Incedent,
 Duck Shark was sent to an Orphan, it lost it's thoughts on Parents and Started Gambling in the Orphan and was arrested. But Fortunately, it was saved by the Hands of
<span class="unq">King Shark</span> and now, it's living a Better life.
<br><br><b>The Final Shark</b> -  Flee Shark<br>
  To be true to Heart, this Shark is a real great Shark. In the Past it was a great Criminal and was yet to get arrested. But <span class="unq">King Shark</span>
 Guarded it from getting Arrested and made it to get Better. Our World says 'The More Power we gain, The More Responsibility we get', but this shark became the Head of Family once,
 but took Zero Responsibilites which made it's own family to Irrespect it. This made it get Stressed and met Stab Shark at a Wine Shop, made a Chaos in the Shop was Arrested for 10 days.
But nothing changed, it repeated the same thing 'Eat, Drink, Start Chaos, get Arrested', but one day the King Blessed it. The Life Changed forever.
 <br><h3>The <span class="unq">King Shark</span></h3>
This Shark is a True Legend , that always gives only the Best, Best, <b>Best!</b> forever. There is no details about <span class="unq">King Shark</span>.<br><br>
